# COMPANY OVERVIEW

The company **Energetix Power Technologies Corporation (EPTC)** is one of the former corporation branch-out from a Singaporean company named UNILIB CORPORATION manufacturer and assembler of Generator sets Synchronizing and Control Panels in Southeast Asia base in Singapore. In year 1990 this company made his name in the Philippine headed by one of the director named Mr. Tang Peck Lam a Singaporean national. He holds a satellite office at ocean Tower, Roxas Blvd. Manila while the assembly plant remains at Singapore. Mr. Tang Peck Lam had successfully cover the Philippine electrical systems requirements giving solutions to various Generator Set vendors requirements like Mitsubishi, Caterpillar and Cummins through designing and supplying their Generator sets Synchronizing and Control Panels.

In year 2004 **UNILIB Corporation** directors had decided to divide the countries that they are going to cover, having an objective to focus into learning and be familiar with the way the market moves in their country of coverage. Mr. Tang Peck Lam being well known in the Philippines market had made his own initiative to cover the Philippines as one of its country of coverage.

In 2010, managed by Adrian Macam, **Energetix Power Technologies Corporation (EPTC)** with the same expertise reorganized with wider market coverage up to Generator Set Products of Very Power, AOSIF, BMJ, VPOWER, POWER LINK, HIMOINSA and MHI-BALDOR Series. For much flexible supply and Services **Energetix Power Technologies Corporation (EPTC)** includes both locally assemble and imported panel depending on the customer requirement.

**Energetix Power Technologies Corporation (EPTC)** was registered to Securities and Exchange Commission with an initial capitalization of 10 Million Pesos. With new business address at Unit 1702 Atlanta Centre, #31 Annapolis St., Greenhills San Juan City.

**Energetix Power Technologies Corporation (EPTC)** - believes that each of our customers are the fuel and the keys to our company growth. They deserve to be respected as a company or individuals and to give best solutions to their needs with excellent services. Being a close friend to them not only as business partner will create a long time business opportunity.

## VISION:

It is our vision to be well known as solution provider in the electrical system market industries and be recognize as a quality electrical panel builder. Dedication to our customer needs by way of giving them timely and best service support we can.

## EPTC CAPABILITIES:

**EPTC** can response to our customer needs to service our supplied equipment within 24 hrs. As soon as we received your call, our on call service technicians will be knocking at your door step within 24 hrs depending on the accessibility of your location.

## EPTC RESPONSE TIME:

**EPTC** is a solution provider organization which cater electrical systems product and engineering services. Our responsibility to our customer starts by giving free product consultation and conceptualization. This responsibility can be extended as to what customer desired in terms of selling our product, electrical power generation system design/integration and its component, installation, testing and commissioning, training, and after sales services. Our capabilities was made possible because of the wide field experience by our personnel. Both management and its technical personnel are in this field for so many years and regularly updating their technical knowledge through hands-on training.

## **Product Line:**

### **Importer/Integrator of ( LOCAL & IMPORTED ) :**

- Generator control Panel and Synchronizing
- Generator Switchgear Panel
  - Low Voltage Application
  - Medium Voltage Application
  - High Voltage Application
- Automatic transfer Switch
- Substation Equipments and Panel
  - Low Voltage Application-ENERCON (Singapore)
  - Medium Voltage Application-ENERCON (Singapore)
  - High Voltage Application
- Distribution Panel
- Transformers -Trafoeletro, Elkima, Trafindo
- Diesel Generator Sets-Stand-by and Base-load-HIMOINSA, GENESAL, AOSIF, POWERLINK
- Bus duct-TRANSLITE
- "UPS-Salicru"

### **Engineering Services :**

- Power Plant and Systems Design
- Project Management
- Power Studies and Design Modification
- Generator and Substation Installation

### **Servicing and Technical Support :**

- Generator Control Panel repairs and Upgrading
- Low voltage, Medium and High Voltage Repair and Upgrading
- Calibration of Protective Relays
- Testing and Commissioning
- Preventive Maintenance
- Resistive Load Bank Rental

### **Rental Services :**

- Resistive Load Bank Rental

### **Preventive Maintenance :**

- Servicing, Troubleshooting, Repairs, Preventive Maintenance
- Overhauling, Rehabilitation, Testing and Commissioning of all kinds and model of Generator Sets.
- Servicing, Rewinding and reconditioning of all kinds and models of Generator Sets.
- Servicing, Rewinding and Reconditioning of all kinds and models of Alternators
- Supply and Installation of parts and accessories of generator sets.
- Load Bank and generator Sets Rentals
- Generator Sets Installation
- In-house fabrication and installation of Generator Set Accessories and sound proofed enclosure
- Project Management by Licensed Engineers
